Telephone Number _____
(please print)

Today's open house meeting is an opportunity to provide input into what gets studied in the Environmental Assessment (EA) for the North Renton Project. The I-405 EIS completed last summer produced the most comprehensive analysis of a transportation system in the state's history. However, before construction work can begin, project level analysis is required to confirm all potential environmental impacts were fully assessed within the project limits—I-405 from SR169 to just north of Coal Creek Parkway.

Please provide any comments you may have in the areas provided below and leave this form with a staff person or at the welcome station where you signed in. You may also mail the form as long as we receive it by **October 17, 2003**.

1. What aspects of the environment do you think should be studied and why?

2. Please describe any concerns you may have about potential environmental impacts.

3. What environmental mitigations do you think should be considered for these potential impacts?

4. Do you have any other comments about the proposed project?
